

World Solution Provider

Six businesses aligned with our customers' needs, acting as one company. Harnessing the imaginations of more than 300,000 people around the world.

GE Industrial

provides a broad range of products, solutions and services such as electrical equipment, automation systems, lighting and appliances; plastics and silicones; security and sensors technology; equipment management and operating services.

GE Infrastructure

one of the world's leading providers of fundamental technologies including aviation, energy, oil & gas, and water process technologies.

GE Healthcare

a leader in the development of a new standard of patient care dedicated to detecting disease earlier and helping physicians tailor treatment for individual patients.

GE Commercial Finance

provides loans, operating leases, financing programs, commercial insurance, and an array of other products and services aimed at enabling businesses worldwide to grow.

GE Consumer Finance

a leading provider, under the GE Money brand, of credit services to consumers, retailers and automotive dealers.

NBC Universal

one of the world's leading media and entertainment companies in the development, production and marketing of entertainment, news and information to a global audience.

What is GE

Consumer & Industrial?

Global and innovative solutions

Consumer & Industrial, a division of GE Industrial, is one of GE's largest businesses in Europe, with 18,000 people in 12 countries and generating \$1.7 billion in annual turnover.

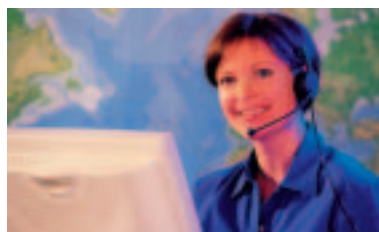

We provide global and innovative solutions for electrical distribution equipment, industrial controls, automation systems, and lighting projects.

Flexible solutions that grow with you

GE offers engineering expertise, quality products and services to build a solution to help improve your productivity and profitability.

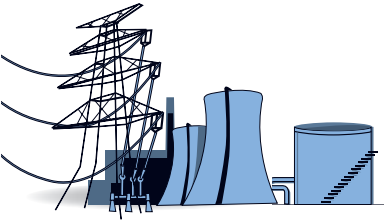

Our open-system solutions allow future upgrades: this way you can improve efficiency with minimal downtime.

Our experience, flexibility and reliability mean simple, intelligent solutions for every aspect of your operation.

We cover all your needs

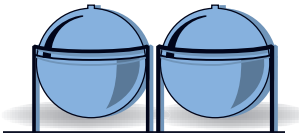

to address your most challenging projects

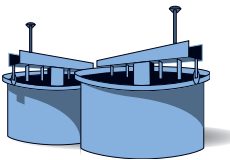

Experience and process knowledge

Power Generation,
Distribution & Utilities

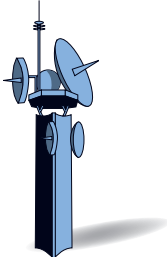

- Full services package: commissioning, assistance, training and maintenance, on site support, remote diagnostic
- Process and business optimisation
- Flexibility to meet project specific requirements

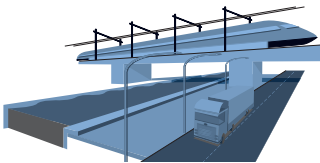

Oil & Gas

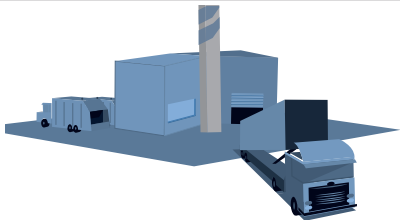

Water

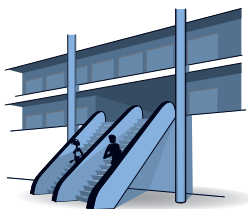

Telecommunications

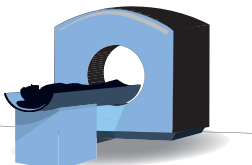

Transportation &
Infrastructure

Waste to Energy

Commercial
Buildings

Healthcare

- Respect of environmental constraints
- Smart energy management & saving cost
- Quality improvement of your outputs

Expertise in multi product lines and systems

Automation & Supervision

LV Switchboards & Motor Control Center

Industrial Components

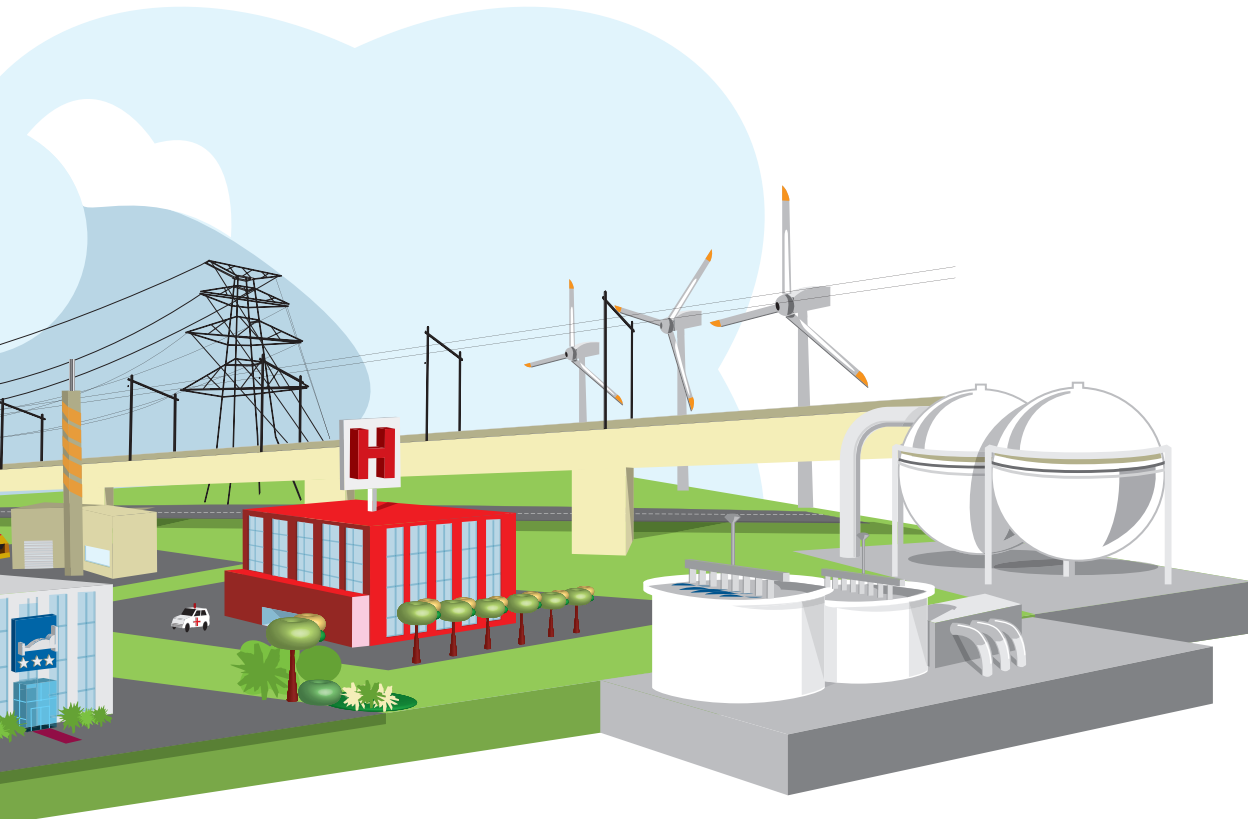

Uninterruptible Power Supplies

Power Management Systems

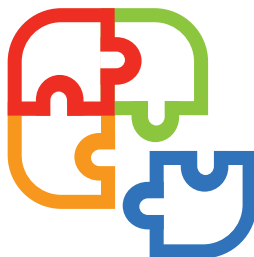

Lighting Systems

GE is also your preferred partner for:

- Security systems
- Turbines
- Sensors
- Water treatment, pumping
- Equipment financing
- Energy rentals
- Temporary building space

Be safe

Securing Power Solutions

Your electrical infrastructure's availability, stability, and adaptability are crucial to your business success. An electrical utility system for power protection and power quality is a long-term investment. During its lifecycle, this system is required to operate at high standards of performance and availability. So service means more than just providing a prompt supply of parts or sending a maintenance specialist to fix a problem; it means taking responsibility.

Our service organisation maintains complete electrical utilities, from incoming feeders up to critical loads. We specialize in preventive and remedial maintenance services for critical power systems, low voltage equipment and industrial controls.

We put at your disposal a powerful worldwide service organisation, available 24/7. Our engineers have wide ranging experience in maintenance and repair and for additional services such as erection or commissioning, a dedicated specialist staff is available. Our capabilities account for your plant security, performance and the quality of your products.

GE can provide every customer with the utmost power reliability and quality, essential to maintain flawless and uninterrupted processes. Through our engineering knowledge, tailored products and dedicated service, we can ensure increased equipment uptime and lifespan, reduced maintenance costs and improved people safety. The credibility and reputation of our global brand, our broad product range, proven technological advance and our effective remote monitoring services have a beneficial influence on the total cost of your projects.

ecomagination™

Ecomagination is GE's commitment to address challenges such as the need for cleaner, more efficient sources of energy, reduced emissions and abundant sources of clean water.

Ecomagination is about the future. GE will focus our unique energy, technology, manufacturing and infrastructure capabilities to develop tomorrow's solutions such as solar energy, hybrid locomotives, fuel cells, lower-emission aircraft engines, lighter and stronger materials, efficient lighting and water purification technology.

We will establish partnerships with our customers to tackle their most pressing environmental challenges and double our research spending to develop the products and services they need.
